Alexander Heinrich  
Zahnmanufaktur Riedenburg  
Hauptstraße 25  
-im Gewerbegebiet-  
Riedenburg, Bavaria 93339  
Germany

Dear Alexander:

We are pleased to welcome your company as a participant in the automatic identification/bar code labeler program. As such your HIBC-compliant labeling will be in compliance with Unique Device Identifier (UDI) requirements, and your participation in standardized product labeling supports the healthcare industry's efforts to improve patient safety and promote effective cost containment practices.

Based on the information provided on your recent application, HIBCC has assigned a Labeler Identification Code (LIC) for your use. The LIC is matched with a permanent record which is maintained in HIBCC's LIC database.

This letter is our official notification of your assignment and should be preserved as your permanent record. Your assigned LIC is as follows:

**D964            ZAHNMANUFAKTUR RIEDENBURG**

You will use your LIC, in combination with your existing product codes and production information, to create UDIs and bar codes for all your devices.

The integrity of the LIC database depends on your cooperation. Please keep us fully informed of current and accurate information on your LIC by notifying us of any change in your company name or address, as well as any change in your business alignment or
